Professional Summary

Fresh Bachelor of Science in Information Technology (BSIT) with 2+ years of hands-on experience building full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Delivered real-world solutions across government, healthcare, and SME sectors from a digitalized local government feedback platform to an HR and payroll management system. 3rd and 1st placer of IT Skills Web Design Competition (2024-2025). Eager to contribute as a junior developer in a fast-paced, collaborative team.

Technical Skills

Languages: HTML5, CSS3, JavaScript (ES2015+), Typescript, PHP

Framework & Libraries: React.js, Next.js, Vue.js, Tailwind CSS, Bootstrap, Express.js, Laravel, Electron.js

Tools & Platforms: Git, GitHub, VS Code, NPM, Vercel, Vite, Figma, Prettier, Adobe Photoshop

Databases: MongoDB, MySQL

Other: WebSockets, JWT Authentication, RESTful APIs, SEO Optimization, Responsive Design

Work Experience & Projects

Full-Stack Developer (Intern)

NIA Repairhub

January 2026 – March 2026

- Built and deployed a full-stack ticketing system using React.js, Express.js, and MongoDB, replacing a manual process and reducing average service response time significantly.
- Engineered a real-time notification and chat system WebSockets, and JWT authentication, enabling instant communication without page refreshes.
- Developed and maintained a secure web-based platform with a MongoDB database backend, improving data retrieval performance and supporting internal.

Frontend & Support Developer (Freelance)

RPh Drughouse Landing Page & CMS

November 2025 – January 2026

- Built a modular, reusable CMS using React.js components, enabling non-technical staff to manage content independently and reducing developer dependency.
- Designed a high-conversion landing page optimized for cross-device performance, ensuring a seamless user journey for mobile and desktop visitors.
- Implemented on-page SEO best practices including optimized metadata, site structure, and internal linking, improving search engine visibility for franchise and local audiences.

Frontend & Support Developer (Capstone project)

SmartHR: HR and Payroll Management System

November 2025 – January 2026

- Designed and automated a web-based payroll module that calculates salaries, taxes, and deductions, eliminating manual calculation errors and reducing processing time.
- Built a comprehensive HR dashboard featuring IP-based time tracking and automated leave management to ensure high-accuracy attendance records.
- Developed a responsive React.js admin dashboard with real-time workforce metrics and dynamic data rendering, translating complex backend data into actionable UI components.

Frontend & Support Developer (Freelance)

Airtechno A/C Hub & Points System

April 2025 – July 2025

- Architected a customer loyalty points system by integrating third-party APIs and physical card infrastructure, automating reward tracking and increasing repeat customer engagement.
- Developed a high-performance landing page featuring a dynamic product catalog and testimonial section to enhance digital brand authority.
- Optimized cross-device and cross-browser performance using lazy loading, asset minimization, and responsive design patterns, improving Core Web Vitals scores.

Frontend & Support Developer (Freelance)

Alang-alang Feedback System

August 2025 – November 2025

- Digitized the local government's feedback process by building a platform that replaced paper-based surveys with real-time data collection and sentiment analysis.
- Improved citizen participation rates by designing an intuitive, mobile-accessible UI, allowing residents to file issues remotely without visiting the municipal hall.
- Streamlined provincial reporting for local officials, providing instant access to community feedback and data-driven insights.

Education

Bachelor of Science in Information Technology

2022-2026

ACLC College of Tacloban, Tacloban City, Leyte
